RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 78 pages. Original publisher: Washington, DC : Division of Fuel, Engineering, and Radiological Research, Office of Nuclear Regulatory Research, U. S. Nuclear Regulatory Commission, 2006. OCLC Number: (OCoLC)278894620 Subject: Nuclear power plants -- Equipment and supplies -- Risk assessment. Excerpt: . . . 1 Introduction The U. S. Nuclear Regulatory Commission (NRC) has supported the research program Proactive Materials Degradation Assessment (PMDA) (USNRC 2007). The objective of this program has been to assess the possible occurrence of materials degradation and component degradation of light water reactors from the view of long-term operation such as would be relevant to relicensed plants. A central intent of the PMDA program has been to predict future occurrences of degradation that may or may not have been observed in the field or in the laboratory. Another objective is to consider the possibility of unexpected increases in degradation rates with time. The PMDA program has included an assessment, conducted under contract with Brookhaven National Laboratory, of past and possible future materials degradation in light water reactors. The study used the Phenomena Identification and Ranking Technique (PIRT)...

Reviews

This published pdf is fantastic. It really is rally fascinating throgh studying time period. I am just very happy to inform you that this is actually the greatest publication i actually have read within my own lifestyle and could be he best ebook for actually. -- Noemie Hyatt

Without doubt, this is actually the very best function by any article writer. it was writtern quite flawlessly and valuable. Once you begin to read the book, it is extremely difficult to leave it before concluding.
