NANOPOROUS ANODIC ALUMINA WITH HEXAGONAL ORDERING

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Synthesis and characterization | Nanoporous Anodic Alumina has received significant attention of the world researchers as a template for the low cost fabrication of nanostructures of metals, semiconductors, polymers, superconductors, etc. In the present work it has been demonstrated that the type of electropolishing pre-treatment and the resulting nano-features on aluminum surface can influence the hexagonal ordering of the pores developed during anodizing. Apart from improving the ordering quality the work has...
