iUniverse, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Dr. Paul H. Ramses Gouda, is a globally renowned chemist who authored several science books and papers. He has been credited with the foundation of several analytical laboratory procedures utilizing Atomic Absorption and Inductively Coupled Plasma for ultra trace analysis of As, Se, Sb Hg. These Methods were officially adopted by EPL and by other agencies, and - as routinely practiced in the scientific arena - they were named after him. The author, who first attended medical school before specializing in analytical chemistry, has acquired two science doctorates. His contributions to the scientific community include several papers in pharmaceutical and medicinal research, including a recent invention of new pharmaceutical compounds based on the unique concept of the chemical manipulation of hormonal and neurological compounds. This is a university textbook and a chemist reference. A must for every library and every analytical laboratory. Tour the author s books at.
